

# Special Olympics

Special Olympics is about people. We practice, play and become friends. Sports take a lot of practice to understand the game. The practice is usually once a week. It is fun because being around people is fun. Practice helps you get to know people better. When you are playing a game you are having fun and learning to handle what a person in charge tells you to do. This helps you when you get a job. When you are working you need to be able to do what a manager tells you. Listening to coaches helps you learn to work better. Since you are practicing and playing games you are meeting people, learning about them and making friends. Since the pandemic, I miss seeing friends each week. Talking on the phone and texting is good but not the same. I am excited about softball. We should start practicing soon and then have a few games. It will be fun!
